Meeting Minutes

Date: 8 April 2020
Time: 5:30 PM
Location: Virtual meeting on Zoom

Attendees: Maryam Al-Emadi, Roqayya AlYousef, Fatima Al-Janahi, Noof Al-Sayed
Absences: -

Agenda:
- Discuss each member's progress so far.
- Implement the fault detection algorithm in the main microcontroller code.
- Start working on the android assignment.

Action items:
- Meeting was done over zoom, where everyone shared their screen at one point to show their work.
- The fault detection algorithm was written in Arduino IDE in C language.
- The program for the android app for an online analog and digital clocks was written in Android Studio.

Next Steps:
- Meet on Saturday (11-4) to prepare for our final presentation rehearsal.
- Fatima will test the fault detection code since the components are in her home.
- Everyone will search how to implement the capability of displaying clock time for two different location for the android app.
